

HOW TO CHOOSE YOUR NEXT STOVE

Firewood or pellets?

Is it important to you to be able to burn regular wood and see the flames dancing?

NO

YES

Are you looking for a heat source that can operate 24/7?

Do you want an opportunity to use the stove overnight and ignite it from a distance/programme the stove?

NO

Choose a wood burning stove

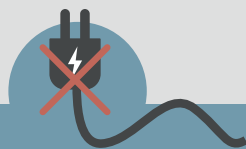

YES

Choose a hybrid stove

NO

YES

Do you want an opportunity to get warm when there is no electricity?

NO

Choose a pellet stove

YES

Choose an Aduro Hybrid incl Aduro DraftOptimizer, which ensures a stable operation

Choose a pellet stove or a hybrid stove, depending on your wishes for the design

PELLET STOVE

- + Stable operation
- + Option for automatic cleaning
- ÷ Noise from the fan and pellets
- ÷ More extensive cleaning on a weekly/monthly basis

HYBRID

- + Design with a great view of the flames
- + Quiet
- + Works without electricity
- + Cosy ambience from a beautiful flame
- + Pyrolysis cleaning
- ÷ Requires slight cleaning every day
- ÷ Requires a stable chimney draft

HYBRID incl. Aduro DraftOptimizer

- + Design with a great view of the flames
- + Quiet
- + Works without electricity
- + Cosy ambience from a beautiful flame
- + Ensures stable operation
- ÷ Requires slight cleaning every day
- ÷ Requires electricity for the smoke exhauster on the chimney

WOOD burning stove

- + Design with a great view of the flames
- + Cosy ambience from a beautiful flame
- ÷ Manual firing every 2-4 hours
